

# Waterborne Styrene Acrylic Coating for General Industrial Applications

with Borchi® Performance Additives

### **Direct-To-Metal Paint Formula**

| Material                              | Function                 | Supplier       | Formulation |
|---------------------------------------|--------------------------|----------------|-------------|
| Deionized Water                       | Solvent                  | N/A            | 5.50        |
| Borchers® AF 1171                     | Defoamer                 | Milliken       | 0.15        |
| Mix Two Materials Below Before Adding |                          |                |             |
| Deionized Water                       | Solvent                  | N/A            | 0.15        |
| Borchi® Gel 0435                      | Rheology Modifier        | Milliken       | 0.15        |
| Surfynol 104E                         | Surfactant               | Evonik         | 0.40        |
| AMP-95                                | Aminomethyl Propanol     | Angus          | 0.20        |
| Borchi® Gen 1252                      | Dispersant               | Milliken       | 0.16        |
| Tiona 595                             | Titanium Dioxide         | Tronox         | 14.96       |
| Grind to Hegman 7                     |                          |                |             |
| Pliotec HDT 12                        | Resin                    | Synthomer      | 64.34       |
| Propylene Glycol                      | Solvent                  | Sigma-Aldrich  | 1.00        |
| Dowanol DPM                           | Solvent                  | Sigma-Aldrich  | 0.80        |
| Dowanol DPnB                          | Solvent                  | Sigma-Aldrich  | 1.20        |
| Optifim Enhancer 400                  | Coalescent               | Eastman        | 0.50        |
| Mix Two Materials Below Before Adding |                          |                |             |
| Deionized Water                       | Solvent                  | N/A            | 0.60        |
| Borchi® Gel 0625                      | Rheology Modifier        | Milliken       | 0.10        |
| RAYBO 60 No Rust                      | Flash Rust Inhibitor     | Raybo Chemical | 0.75        |
| Deionized Water                       | Solvent                  | N/A            | 8.83        |
| Borchi® Gol LA 200                    | Flow/Leveling/Deaerating | Milliken       | 0.21        |
|                                       |                          | Total          | 100.00      |

### **Performance Additives:**

### Borchers® AF 1171:

- VOC-free, silicone based
- Anti-foaming agent and defoamer

### Borchi® Gel 0435:

- APEO-free , non-ionic polyurethane based
- High shear HEUR rheology modifier

### Borchi® Gen 1252:

- 100% active, VOC-free and APEO-free
- Wetting and dispersing agent

### Borchi® Gel 0625:

- VOC- and APEO-free, non-ionic polyurethane based
- Medium shear HEUR rheology modifier

### Borchi® Gol LA 200:

- 100% active, VOC-free
- PDMS additive for improved slip, deaeration, substrate wetting, and flow and leveling properties

### **Formulation Specifications:**

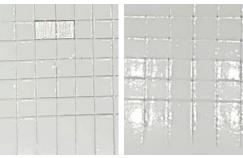

Lb/gal: 9.68, VOC (g/L): 82.90, Viscosity: 95-105KU, PVC: 10.88%, NVV: 40.25%, NVM: 48.88%

### **Improved Blocking Resistance**

Without Borchi® Gol LA 200 With Borchi® Gol LA 200 6 mil WFT, 7B Leneta Chart, 24 hour cure, 120°F 1 Hour, 1 kg weight

# **Good Adhesion Performance**

Aluminum Cold Rolled Ste 15 mil WFT, Cured 7 Days, Permacel Tape

### **Good Corrosion Resistance**

ASTM B117 Q-Fog Salt Spray 15 mils WFT, 250 Hours
